

FALL - WINTER 2022

INTERNATIONAL FOOTWEAR COLLECTION

THE KAMIK HERITAGE

With deep Canadian heritage, family spirit, and over 120 years of craftsmanship and expertise, Kamik is synonymous with quality footwear. From rain, to fall and winter, we've got the footwear needed to tackle any weather. Keeping feet warm and dry is something we just know how to do.

Welcome to the Fall-Winter 2022 Collection

SUSTAINABLE MANUFACTURING

is more than what we do. It's a significant part of who we are.

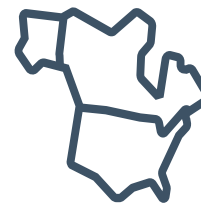

Zero-waste Target

Production
Plant

Kamik strives for operating a zero-waste factory in Montreal.

Made In North America

70% of products are made in North America, cutting down on shipping and saving fuel to help reduce Kamik's carbon footprint.

Reducing Our Carbon Footprint

Kamik's plants use renewable energy to run the machines, no fossil fuels are used.

KAMIK'S

Sustainable Felt Liners

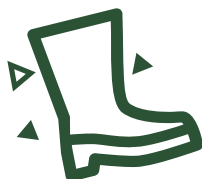

and other plastic content are used in a year to produce our Canadian-made Kamik felt liners.

A new recycling felt line was installed to recycle in-house all the scraps from the felt cutting operation. We now recycle and reuse over

100,000 

lbs of needle punched felts in a year.

100% of production rejected rubber is recycled and used in new products, enough to produce

360,000

black rain boots.

Our recyclable packaging used recycled materials, saving approximately

132 cars' CO₂
emissions in a year.

All leather used in our products are produced in

**GOLD-RATED
TANNERIES**

as designated by the Leather Working Group.

TECHNOLOGIES

COMFORT

COMFORT RATING

Match our boots with your consumer's needs for warmth depending on their activity levels and weather conditions.

KAMIK REMOVABLE LINERS

Ensures optimal warmth. Sustainable and made with up to 100% recycled materials.

WATERPROOF

DRiDEFENSE

Our proprietary waterproof membrane prevents any water from getting in, keeping feet dry.

WATERPROOF SEAM-SEALED

All of the materials and seams (visible and invisible) are specially treated with waterproof tapes and sealants to block moisture and keep feet totally dry.

WATERPROOF BOTTOM

The waterproof bottom provide a great barrier between feet and snow or water, enabling you to stay dry no matter the weather.

GORE-TEX

This legendary waterproofing technology is as breathable as it is impenetrable.

FAMILY FRIENDLY

EASY GRAB LACE LOCK

This closing system keeps the elements out; the knob on the bungee lace makes boots easy to adjust.

PULL N' LOCK

One-pull of the bungee lace and the knob locks automatically without additional effort.

GENEROUS FIT

These are cut wider at the calf to give a little extra leg room, and providing comfort for an easier fit.

OUTSOLE

RUBBER^{He}

Light and strong, our proprietary technology offers superior traction and flexibility, and is 100% recyclable.

GRIP^{He}

Outsole technology with lightweight blown EVA and rubber grip points for maximum comfort and traction.

GRIP^{XT}

Outsole designed with self-cleaning lugs to stop snow from accumulating in the grooves and to maximize winter traction.

VIBRAM

Our outsoles featuring Vibram technology provide superior grip on icy surfaces, cold terrain or snow covered surfaces. The rubber compound has uniquely designed lugs and is flexible at all temperatures to offer superior stability

ARCTIC GRIP A.T. (ALL TERRAIN)

This evolution of Vibram Arctic Grip uses Vibram's newest compound, XS Trek Evo, that provides added durability and improved grip on wet and dry surfaces. With Vibram Arctic Grip A.T., winter traction now extends to shoulder seasons from September to April.

SECURITY

NITE RAYS

A reflective binding or patch on the boot for added safety after the sun sets.

OIL AND ACID RESISTANT

The protective compound stops oil, acid and a variety of other chemicals from penetrating, keeping your feet safe and splatter-free.

COMPOSITE TOE

Our CSA and ASTM-approved composite toecap conforms to industry standards for added safety.

STEEL TOE

Our CSA and ASTM-approved steel toe conforms to industry standards for added safety.

LOCKFIT

Cradles and supports your ankle, locking it in place for optimal perfect fit, comfort and stability when walking on uneven surfaces.

SUSTAINABILITY

VEGAN - FRIENDLY

This product is made without materials from animal byproducts, nor was it tested on animals.

RECYCLABLE

All of our domestically-made rubber boots are up to 100% recyclable.

GENUINE LEATHER and SUEDE

This material greatly enhances protection against natural elements and terrain. Kamik's leathers are from tanneries rated Gold for their water, energy, and waste management practices.

SUSTAINABLE INSULATION

Innovative DRI-CAVE™ Technology helps removes moisture from body for ultimate comfort.

LEATHER WORKING GROUP

Kamik Canada Inc. has joined the Leather Working Group (LWG) to support and contribute to environmental best practice within the leather industry.

LITE ECO-FRIENDLY LEATHER

ISA TanTec's LITE™ (Low Impact To the Environment) facility is designed to control water and energy consumption, limiting chemical application during the production process to make eco-friendly leathers.

ODOUR CONTROL

Cleansport NTX™, a natural, non-toxic, organic compound with probiotic technology that breaks down odourous composites.

ORTHOLITE® HYBRID™ is a patent pending formulation that uniquely blends 5% recycled rubber and 15% production waste foam for 20% eco-content for uncompromised performance with less impact on the planet.

KAMIK REMOVABLE LINER GUIDE

Many of Kamik's liners are made from recycled content, mostly plastic water bottles, using approximately 3 million bottles per year.

NEW KIDS' WINTER BOOT LINERS

Featuring the same technology of our other Zylex liners but the + (plus) versions highlight an oval-shaped perforated design to enable the thermal barrier layer (that reflects body heat) to show through the insulation layers.

Zylex+ liner is included within the Glacial 4 | Zylextra+ liner is included within the Shockwave

We don't just put technology into our boots. We also make sure our liners are packed full of it.

1 MOISTURE-WICKING LAYER

Interior layer wicks perspiration and moisture away from the foot to keep feet dry.

2 INSULATION LAYERS

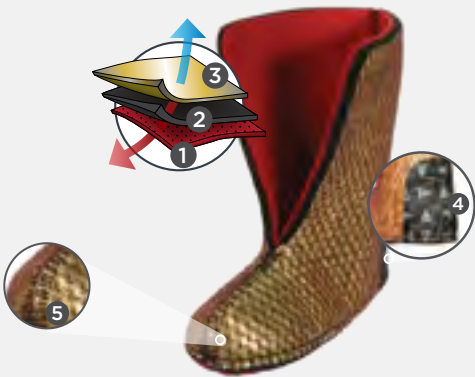

Second layer traps body heat in natural air pockets to keep feet warm. It also traps warm air while conforming to the foot.

3 THERMAL BARRIER LAYER

Outer layer deflect cold air from the outside while reflecting body heat back to the foot.

4 & 5 REINFORCED HEEL AND STITCHING

Reinforced seams & heel guard provide superior durability.

Reference from the Genuine Brannock Foot-Measuring Device

The 12 - 17 mm difference between the foot length and the last length is meant for consumer comfort and is explained by the rounded shape of the shoe at the toe and the heel. When using the Kamik sizing chart, consumers can refer to our website: www.kamik.com for specific sizing tips per style.
